## PROFESIONAL PROFILE

Experienced in object-oriented programming, developing, testing and debugging code; designing interfaces; and administering systems and networks. Web developer with extensive knowledge and experience using Java, PHP, NodeJS and Javascript. My most recent experience has been as a full stack web developer at a new start-up.

Highly disciplined, able to work in a high-pressure team-oriented workplace, strong personal skills.

## WORK EXPERIENCE

Oct 2013 - Feb 2014

### **API and Mobile App Developer**

*Start-Up, Uzlist.com, Part-Time*

Collaborated with developers, implemented API and mobile app using Phonegap and Java for an existing CMS. Technologies used: Java, JavaScript, CSS3 and HTML5.

Problems solved:

- Implemented API using NodeJS and MongoDB.
- Implemented 2 versions of app: native Android and phonegap versions.
- Successfully implemented 3rd party libraries in JavaScript and Java.
- Tested cross-browser, cross-platform, and/or cross-device compatibility for inconsistencies.

Jun 2013 - Jan 2014

### **Full Stack Developer**

*Start-Up, Uzlist.com*

Full stack engineer responsible for development of distributed Content Management System (CMS). Worked extensively with AngularJS, jQuery on front-end and MongoDB, NodeJS, Redis on back-end.

Problems solved:

- Login system, forum processing.
- JSON and HTML template caching.
- Utilized HTML5 APIs, image viewing, image re-sizing and processing.
- Integrating data and user accounts between multiple systems for a client.
- Implemented a template driven system with a clear separation between content and display.
- Utilized MongoDB, optimized SEO, SMTP Mail Server, email templates.
- Web crawler scripts.
